

Stephen Best Memorial Tournament

The North Texas GCSA held its 6th Annual Stephen Best Memorial Pro/Superintendent Championship in June at Sky Creek Ranch Golf Club in Keller. We were so thankful to be able to gather again to celebrate and remember a friend after last year's event was unable to be held due to Covid-19 restrictions.

The course conditions were fantastic and provided for a great venue to crown this year's champions. Thank you to Sky Creek Ranch and Professional Turf Products for your continued support of both this fantastic event and the NTGCSA.

We hope to see you at next year's event!

Family Social Recap

Thank you to all that joined us for our annual family social at Top Golf in Allen last month. After last year's Covid hiatus, it was so nice to be able to gather, catch up and enjoy one another's company. We had a great evening with food, fellowship, fun and prizes for all. More photos of the event can be found on our Web site at www.ntgcsa.org.

We're already planning how we can better this event for next year, and hope to see more families then! If you have feedback or ideas for us, please reach out to Shannon at ntgcsa@gmail.com.

President's Message

I hope that this note finds you all well and that the Summer has been kind to you and your course. The weather in 2021 continues to keep us guessing as we saw record cold in February, a very wet May, a relatively cool June and July eventually gave us some triple digit heat. Through it all the North Texas Golf Course Superintendents Association membership continues to provide some of the best golf playing conditions in the country, and still found time to attend excellent North Texas GCSA events such as the Chapter Championship at Lantana Golf Club and the Stephen Best Memorial Super/Pro event at Sky Creek Ranch. We also were able to gather the families together at our annual family social event at Top Golf in Allen for an evening of fun and fellowship. Thanks to everyone who attended and supported these "in-person" events as we return to a bit more normal schedule in 2021 after the Covid - 19 protocols impact last year.

The biggest recent news in the Chapter is of course the official welcome of Shannon Phillips as our new Executive Director. Shannon started officially on July 5, 2021 so be sure to welcome her at our next event or send a quick email if you have a minute. The Board of Directors interviewed 7 outstanding candidates for the Executive Director position in two separate rounds of interviews. Thank you to everyone who applied and thank you to the entire Board of Directors for their professionalism and commitment. The future of the North Texas GCSA is in good hands.

As we head towards the Fall I wanted to remind everyone that our annual meeting will be at Bear Creek Golf Club on Tuesday October, 19th so be sure to register. This is the most important meeting of the year as we conduct the annual business meeting and hold elections for Directors and Officers of the Association. This is your chance to get involved. You can run for a position on the Board of Directors, volunteer for a committee or to host an event in 2022. We need your help and input. If you want more information on how you can serve our association please contact me at Anthony.williams@fourseasons.com. Now is the perfect time to volunteer!

I want to remind everyone that the Best Management Practices (BMP's) have been published for Texas and we all send a huge THANK YOU to everyone at the Lone Star GCSA and GCSAA who made this possible. We are now moving into the Facility adaption phase. We will be organizing training and opportunities for everyone to complete this next critical step so that we can continue to improve our stewardship of resources and advocacy with proven data, watch the website for more details.

It is a privilege to serve as your President in 2021 and I want to personally thank you all for your membership and to our vendor members and sponsors thank you for all that you do to make all of our events and charitable causes successful. Be kind to yourselves and others as we continue to build our industry and communities in these ever changing times. I look forward to seeing you at a North Texas GCSA event soon.

Respectfully,

Anthony L. Williams MG, CGCS, CGM

President North Texas Golf Course Superintendent's Association

Legacy and Turf Scholarship Applications Now Available

The North Texas GCSA Legacy Scholarship offers educational aid to children and grandchildren of NTGCSA members in good standing. Students must be enrolled full-time at an accredited institution of higher learning, or in the case of high school seniors, must be accepted at such an institution for the next academic year. All applications must be postmarked by September 15, 2021. Applications and more information can be found on our Web site at www.ntgcsa.org.

The NTGCSA Turfgrass Scholarship offers educational aid to a student currently attending or enrolled in an accredited university and pursuing a degree in Turfgrass Management (or a related field) with the intentions of becoming a golf course superintendent. Awards are funded by the NTGCSA. All applications must be postmarked by September 15, 2021. Applications and more information can be found on our Web site at www.ntgcsa.org.

How Do I Safely Enjoy Working and Playing Outside When It's Hot?

Anthony L. Williams, MG, CGCS, CGM

There are a few things that are certain and one of them is when its summer time in Texas it will be HOT and the SUN will be bright! July has historically brought us days with record heat and humidity but when you are a professional greenkeeper, avid golfer or landscaper you still get out and enjoy the day. However, you should be aware of the risks that outdoor activities in high temperatures bring. July is National Heat Stroke Prevention Month, so on the heels of another successful Stephen Best Super/Pro event and August's high temperatures we answer the question, "how do I safely enjoy working and playing outside when it's hot".

Sun Screen is Necessary

Summer golf is great! However, superior turf conditions are made possible through excellent maintenance practices, so whether you are working on or playing on the golf course you should be aware of the risks from heat or sun exposure. First, let's talk about the most obvious risk, sun exposure. I have been a golfer and professional greenkeeper for 36 years and I keep my dermatologist appointment annually because the greater your exposure to the sun, the greater the risk of skin cancer. That doesn't mean we are doomed to stay indoors away from the sun, but it does mean we need to take some positive actions to play the game we love or to keep up the maintenance of our green spaces. No matter the forecast, sunscreen is the one step you should never skip before heading outdoors for the day, especially in the summer. Sun Protection Factor or SPF is the most common rating for sun screens and they generally range from 30 to 100 SPF. SPF 30 blocks nearly 97% of UVB radiation, SPF 50 blocks about 98%, and SPF 100 blocks about 99% respectively.

Remember to

apply and reapply sunscreens as needed and be aware that sun screens can expire so check the date on the sunscreen that has been in your golf bag or maintenance cart for a while. Also note that these expiration dates are only accurate if the product was stored in a cool dry place (leaving sun screen in your cart or mower is not advised). Another good sun screen tip is to look for broad spectrum protection on the label. This ensures your SPF protects against both harmful UVA and UVB rays. (UVA rays prematurely age skin and UVB rays burn; both can cause skin cancer). Experts recommend choosing SPF 50 or higher. Ask your dermatologist when you have your next checkup what they would recommend.

Wear the Right Clothes

For our purposes today we are going to focus on the function of summer clothes, not necessarily on fashion. These tips apply whether you are working or playing in the heat. It is important to wear light, loose fitting clothes that are breathable, allowing sweat to evaporate from the skin as activity and temperatures increase. The evaporation of sweat will decrease the (Continue reading on Page 11)

Continued: How Do I Safely Enjoy Working and Playing Outside When It's Hot?

(Continued from page 9) body's temperature. Note that the upper body sweats more than the lower half, so wearing clothing that is loose-fitting and allows for more air circulation from the waist up is a good way to transfer heat away from the body. We lose 50% of our body heat from our scalp and our face. Hats used for sun protection should be designed to allow for good ventilation of the body's heat from the head. It is also a good idea to wear wide brimmed hats for more sun protection for the ears and neck. Generally, opt for lightweight, light-colored and loose fitting clothing. Loose fitting garments allow air circulation and light colored fabrics reflect light and heat. This will keep you cooler. Natural fiber fabrics; cotton, linen and silk work best in absorbing sweat and allow the skin to breath. Modern synthetics can also be effective but experts recommend trying a few fabrics and styles and go with what works best for you and test them in moderate temperatures working up to heavier activities in higher temperatures.

Heat Related Emergencies: Heat Exhaustion verses Heat Stroke

It is important to know the difference between heat exhaustion and heat stroke and to know what to do to help someone who is experiencing a heat related illness. Heat exhaustion happens when your body gets too hot. If you don't treat heat exhaustion, it can lead to heat stroke. This occurs when your internal temperature reaches at least 104°F. Heatstroke is much more serious than heat exhaustion. It can cause shock, organ failure, or brain damage. In extreme cases, heatstroke can kill you so it's important to be aware of the signs of heat stress and take the appropriate actions as soon as possible. (Continue reading on page 13)

TURFMATERIALS.COM
SPORTS TURF'S SAND & GRAVEL SUPPLIER

Continued: How Do I Safely Enjoy Working and Playing Outside When It's Hot?

(Continued from page 11) Symptoms of heat exhaustion are: muscle cramps, heavy sweating, pale or cold skin, weakness and/or confusion, dizziness, headache, nausea or vomiting, fast heartbeat, and dark-colored urine (which indicates dehydration). In addition to these symptoms, warning signs of heatstroke also include: fever of 104°F or higher, flushed or red skin, lack of sweating, trouble breathing, fainting and seizures.

You can help yourself or others experiencing a heat emergency by doing the following:

To treat heat exhaustion, you should:

- Move to a cooler area, out of direct sunlight
- Loosen clothing
- Apply cool, wet towels to your face, neck, chest, and limbs
- Have someone fan your skin
- Drink cool water or sports drinks every 15 minutes
- Don't drink too quickly

Heatstroke is a life-threatening emergency. Call 911 or go to an emergency room immediately. In the meantime:

- Move the person to a cooler area, out of direct sunlight
- Loosen clothing

(Continued from page 13)

- Remove any sweaty clothing
- Apply cool, wet towels to the face, neck, chest, and limbs.
- Apply ice, if you have it, to the underarms, wrists, and groin
- Fan the person's skin
- Offer cool water or sports drinks every 15 minutes if the person is conscious

Children and adults over 65, anyone that is overweight or consuming alcohol are all at greater risk of having a heat related emergency.

Stay Hydrated

The good news is that heat-related illness and injury are fully preventable. The most important key to avoid missing work, play or general outdoor fun is to drink enough water. You should drink enough water to have to urinate before your activity (work or play) starts and then drink 4-6 ounces every 15-20 minutes during times when you are actively sweating. At the end of the activity, you should have to urinate again and the color of the urine should be clear to light yellow both before and after the work or activity. If you are unable to urinate or the urine is dark-colored after a workout, you didn't drink enough water. Dehydration affects not only your skill potential but it also risks your health, especially when the temperatures are high, over 90 degrees. Water is always the best option to stay hydrated but drinks with added electrolytes are safe to consider for extended activities. Sweat causes fluid loss as well as the loss of electrolytes, such as sodium. This can result in headaches, stomachaches and muscle cramps. Starting with water and switching to an electrolyte drink halfway through the planned activity is something to consider. Avoid energy drinks, the caffeine can actually make you more dehydrated.

The Point of the Matter

We are professional golf turf managers and spend most of our days outside (it is why most of us choose this profession in the first place) but we must take personal responsibility for our (and our staff's) health and take actions to prevent heat emergencies and sun related skin damage. Following the simple guidelines above can keep you productive and safe while working and playing outside in the elements. Please be sure to visit your dermatologist regularly, annually if you have never had any issues and if you have had previously diagnosed skin cancers or other problems you should commit to seeing your dermatologist for a complete exam every six months and follow their recommendations. Prevention and early detection saves lives and keeps us all in the game.

GAIL'S FLAGS

ESTABLISHED 1976

NTGCSA August and September Events

August

Registration for our August Chapter Event sponsored by Longhorn is open! The event will be held on Tuesday, August 31 at Tangle Ridge Golf Club. Registration will begin at 11am, with lunch at 12pm and a 4-man scramble kicking off at 12pm. Grab your team and register at our Web site at www.ntgcsa.org.

September

The September Education Meeting sponsored by Harrell's will be held on Thursday, September 23rd in the Water and Land Resources Building at the Texas A&M Agrilife Research and Extension Center.

Attendees will be eligible for 5 CEU's from TDA, as well as .5 from GCSAA. Registration for the event will open on Wednesday, September 1 at www.ntgcsa.org.

NTGCSA Award Nominations Open

The North Texas GCSA is approaching a very special time of the year when the association honors the many deserving members who have demonstrated an above and beyond effort and commitment to their golf facility, their association and their profession.

A.C. and Garry Bearden Superintendent of the Year Award

Since 1972, the North Texas GCSA has honored a Superintendent each year with first the Superintendent of the Year Award, and beginning in 1987 the A.C. Bearden Superintendent of the Year Award and eventually as it has been known since 2014, the A.C. and Garry Bearden Superintendent of the Year Award. Each year, the winner is honored at the Annual Awards Banquet held in January.

In 2003, the organization chose to request nominations for deserving candidates from Club Officials, General Managers, and Head Golf Professionals at facilities where eligible members are employed. Recommendation letters are due no later than September 30, 2021.

Assistant Superintendent of the Year

The Board of Directors is excited to announce a great opportunity for the "unsung heroes" of our industry to be recognized for their hard work, commitment and dedication. The association will recognize the Assistant Superintendent of the Year based on their qualifications and accomplishments. Applications for this award are available on our Web site at www.ntgcsa.org.
